

# UN Certified Biological Shipping Systems Available

THE FOLLOWING SHIPPING SUPPLIES ARE AVAILABLE THROUGH OSEH TO UNIVERSITY DEPARTMENTS AT COST. These shipping systems accommodate a variety of primary containers and include products for shipping with dry ice. Shipping systems are for those laboratories that have limited or occasional shipping of biologics. Those laboratories that ship more frequently may purchase bulk shipping systems directly from suppliers. Contact Janet Follo at 647-3133 if you have questions regarding shipping systems or require assistance with shipping biological material.

Note: Anyone who prepares a hazardous material for shipment must be trained to know exactly how to classify, contain, pack, label, and manifest the material according to DOT/IATA requirements for safety.

PLEASE INDICATE THE NUMBER YOU WISH TO RECEIVE IN THE BLOCK(S) PROVIDED.
